Period fo	The MAILING DATE of this communication apor or Reply	opears on the cover sheet with the c	orrespondence address V			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 7-9 are pending. This action is final.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishimori et al. (6,038,840).

Ishimori et al. shows the claimed invention where a chute (68) on a lawn mower (figure 1) is disposed between an oil reservoir ((7,8) in the form of a transmission, the transmission containing a lubricant, thus is a reservoir and the axle driving an axle, thus also an axle driving apparatus) and a belt (see figure 2 where the belt wraps around an idler pulley (61e) on the opposite lateral side of the chute from the oil reservoir).

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/615,913

Art Unit: 3682

5. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ishimori et al. (6,038,840) in view of Abend et al. (2003/0057009).

Ishimori et al. shows the claimed invention as recited above; however, Ishimori et al. uses a direct drive axle drive as opposed to a belt driven axle driving apparatus.

Abend et al. shows a belt driven axle driving apparatus.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the belt drive of Abend et al. into the lawn mower of Ishimori et al. for the purpose of providing an efficient and low cost means to transfer power; as the direct drive arrangement is heavy and costly to manufacture.

Also, it has been long held that the mere shifting of parts is not patentable *In re Japikse*, 86 USPQ 70 (CCPA 1950). In the instant case, Applicant has merely arranged the chute between the belt and an oil reservoir. These parts are old and well known. The shifting or rearranging of parts within a known device has not, in itself, been held patentable.

Response to Arguments

6. Applicant's arguments with respect to claims 7-9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Poplawski et al; Ishimori et al.; Cox et al.; and Johnson et al. all show belt driven drive systems.

Application/Control Number: 10/615,913 Page 4

Art Unit: 3682

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.

Certificate of Mailing

I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to:

Commissioner for Patents

Application/Control Number: 10/615,913 Art Unit: 3682 P.O. Box 1450 Alexandria, VA 22313-1450 (Date) Typed or printed name of person signing this certificate: Certificate of Transmission I hereby certify that this correspondence is being facsimile transmitted to the United States Patent and Trademark Office, Fax No. (703)_____ - ____ on ____

Please refer to 37 CFR 1.6(d) and 1.8(a)(2) for filing limitations concerning facsimile transmissions and mailing, respectively.

Typed or printed name of person signing this certificate:

(Date)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M. Fenstermacher whose telephone number is 703-305-7438. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bucci can be reached on 703-308-3668. The fax phone number for . the organization where this application or proceeding is assigned is 703-872-9306.
